Elcomsoft iOS Forensic Toolkit
Version 8.0 b5

Elcomsoft iOS Forensic Toolkit helps forensic experts perform extended logical and full file system acquisition of iOS, iPadOS, watchOS and tvOS Apple devices.

Summary

Elcomsoft iOS Forensic Toolkit 8.0 b5 for Mac offers forensically sound, checkm8-based extraction of a series of iPhone models, including Apple Watch Series 3. The low-level extraction helps access crucial evidence without altering the data.

Essential updates

### Extraction Agent: added support for a range of iOS devices

The Elcomsoft iOS Forensic Toolkit extraction agent expands the range of supported iOS versions for select devices (iPhone 8, iPhone 8 Plus, iPhone X, iPhone Xr/Xs, iPhone 11, iPhone SE 2020 and compatible iPads): full file system acquisition is now possible for iOS up to and including 15.0.1.

Verifiable low-level extraction via checkm8:

This release adds support for the Apple Watch Series 3 devices. The full list of supported models now includes: 5s, 6, 6 Plus, 6s, 6s Plus, SE, 7, 7 Plus, 8, 8 Plus, X and Apple Watch Series 3. Repeatable and verifiable full file system extraction using checkm8 exploit, including a copy of the keychain. For locked devices with an unknown passcode, limited BFU (Before First Unlock) extraction is available.
